

Junior Software Engineer (f/m/d)

Founded by industry leading experts, **Amfileon's** mission is to find and capitalize on inefficiencies in liquid capital markets by building statistical models based on relevant data sets. We employ state-of-the-art trading technologies & algorithms to implement our models in global markets. Our team consists of highly numerate, detail-oriented scientists.

The Role

We are looking to hire a motivated and team-oriented Junior Software Engineer to become a part of our engineering division. You will harness your coding skills and penchant for problem-solving to contribute to and enhance our trading systems and strategies.

You will be working intimately with a cadre of seasoned software engineers and quantitative analysts. Your focus will be on the development of new strategies based on quantitative analysis specifications, refining existing strategies, and actively reducing technical debt. Your contributions will be pivotal in fortifying the capabilities of our in-house trading systems, ensuring that our trading operations run seamlessly.

Responsibilities will encompass:

- Co-creating strategies with quantitative analysts based on their specifications and requirements
- Ongoing maintenance and enhancement of established trading strategies
- Collaborating with senior engineers to identify and eradicate technical debt
- Documenting requirements and contributing to the development of in-house trading systems
- Aiding in the expansion of in-house trading system functionalities

What we offer

- A team of knowledgeable colleagues eager to learn and exchange expertise in a dynamic environment
- The chance to work on influential projects right from the start
- A unique profit-sharing plan that rewards every member of our team

Who we are looking for

The ideal applicant will demonstrate the following attributes, abilities, and qualifications:

- Bachelor's degree in Computer Science or a related discipline
- Practical experience in Python programming
- A proactive approach to learning and developing new skills within the realm of software engineering
- A capacity for innovative thinking and the ability to think outside the conventional framework

- Effective teamwork and communication skills
- Previous experience in a team-oriented environment

No prior financial markets experience required

How to apply

Please send your CV to careers@amfileon.com. We are looking forward to hearing from you.
